

Important Notes

- Toilets need to be sited on level ground to ensure they will function correctly.
- Our delivery vehicles are large transit size and toilets cannot be moved very far once taken off the vehicle so we need to get the vehicle close to where you wish the toilets to be sited.
- Our toilets are 4ft wide; please bear this in mind if you have gates/passages that they need to be taken through.
- Our toilets are too large to be carried over walls or other obstacles so if this is likely to be a problem please mention it.
- We can maneuver toilets over lawns however we cannot guarantee that your grass will not be damaged.
- Our toilet units do not have interior lighting, however it can be provided on request. The toilet roofs are translucent and allow through a lot of exterior light so if they are positioned under a good light source they can be used in darker conditions without the need for interior lights.
- We understand that sometimes it is not possible for our customers to be present when we deliver toilet units, however if you cannot be there to show us where the toilets need to be situated then please ensure that it is obvious where they must go as we may not be able to return to move toilets when we have left site.
- Please be aware you are responsible for the toilet unit during the duration of the hire, any damage must be paid for.
Please put insurance cover in place, the replacement value for insurance purposes is £600.00 + VAT per Single Portable toilet unit.
- If you prefer we can arrange to put cover in place for you @ £5.95 + vat/per toilet unit.
- Finally we would like to thank you for choosing to use Ab-Fab Loos to supply your portable toilet units and we would like to take this opportunity to wish you every success with your event.
